

An innovative program designed to put more options in the hands of businesses who want to buy IT and Network Solutions from one provider.

Altaworx GPS Asset and Fleet Tracking Solutions

powered by **AT&T**

Having a tracking solution for your business makes your company more productive and efficient, while reducing costs.

- Save Fuel - Eliminate unnecessary driving by optimizing routes while eliminating personal stops and unauthorized use.
- Reduce Speeding - Eliminate unsafe driving, extend the life of your vehicles, and improve gas mileage.
- Get Alerts - Know what's happening with your vehicles as it happens
- Reduce Labor Cost - Receive accurate records of hours driven with historical data.
- Improve Customer Service - Know where your vehicles are at all times, allowing you to route the closest vehicle to new service calls.

Fuel cost is the number one operating cost for companies with fleets. Harsh and aggressive driving, speeding, and unauthorized use all contribute to higher fuel cost. Using fleet and asset tracking reduces fuel, maintenance, and labor costs, while improving customer service, productivity, and efficiency.
