

## Wireless LTE Failover

### Primary and Backup Connectivity with Speeds up to 75 MB, with under 75 Milliseconds of Latency

Having a wireless backup solution from Altaworx ensures your business communications network has automatic, cost effective backup to your wireline internet service or private wide area network (WAN).

- Eliminates costly interruptions to your critical business processes.
- Ensures you're always connected to the internet, private data networks and your voice service providers when your wired internet service is not available.
- No more lost revenue or frustrated customers because your internet service is down.
- Stay connected to the internet when natural disasters disrupt your wireline internet access.

Our Wireless Backup Routers allow your staff to keep serving customers without interruptions when your primary internet service provider or private WAN is down. The Altaworx backup solution is an easy to install, cost effective way to make sure your business stays up and running, protecting your bottom line and keeping your customers happy.

**Prices starting at \$29.95 per month. Call your sales representative for more information.**

### Key Features

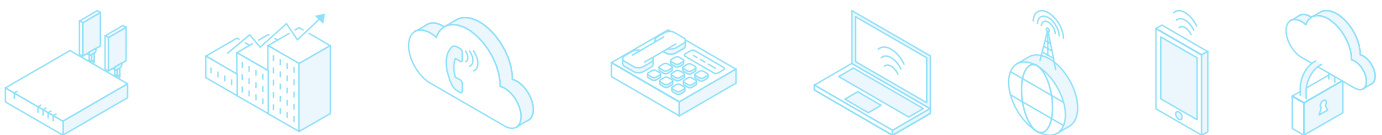

- LTE Certified embedded cellular modem
- Compact size
- M2M solution
- Branch office or retail solution
- Optimal signal strength placement
- Enterprise ready

### Benefits

- Connects any Ethernet device to cell network
- LTE Certified embedded cellular modem
- Neutral color and included mounting hardware ideal for branch office and retail locations
- Included battery for site survey to identify optimal signal strength placement
- PoE Cable to remotely power
- Accelerated View for central cloud-managed facilitates rapid deployment and management of large networks

### Industry

- Retail Chains
- Distributed Enterprise
- ISP / Telecom
- Managed Services
- M2M & IOT applications including: Kiosks, POS, ATM, Digital Signage, smart connected devices, Healthcare

## 6300-CX Cellular Extender

### Everything You Need to Stay Connected

Every minute of network downtime costs you time and money! With the unprecedented growth of the Internet of Things (IoT) and reliance on this new generation of connected devices pushing your business to use even more data, you need to be prepared for connectivity outages that can impact your customer service, sales, brand reputation and even put your legal and financial compliance systems at risk.

To succeed in today's connected economy, anywhere network access, in real-time and 100% of the time, is a requirement. Your business needs a reliable and scalable solution that connects distributed devices and networks in a consistent way, regardless of where the devices are located. Our latest generation of cellular connectivity router, the Accelerated 6300-CX Cellular Extender, is your solution.

In today's connected world of Machine to Machine (M2M) communications and IoT, Accelerated offers you peace of mind at an affordable price. The Accelerated 6300-CX is a compact, affordable, high-performance, LTE or 3G enterprise router that is ideally suited for connections to the IoT, as well as primary or backup connectivity for branch office, distributed sites, smart devices and retail locations.

### Designed For Primary or Backup Connectivity

The Accelerated 6300-CX allows any Ethernet connected device to utilize cellular wireless data for either primary or backup connectivity. Carrier Certified embedded cellular modem supports LTE and 3G connectivity. The 6300-CX's compact size (4.3 x 4.3 x 1 inches) makes the 6300-CX an ideal solution for your M2M applications.

### Engineered For Easy & Optimal Installation

The Accelerated 6300-CX ships with a temporary battery pack that can be used to perform a site survey to identify an ideal mounting location with optimal signal strength. The included PoE cable and extensive mounting hardware facilitate rapid installations.
